Creating **INSPIRING DESIGNS**

The value of a well-designed and welcoming workplace

The way a business presents itself informs the first impression people have when they visit the premises. Customers, visitors, and employees make immediate assumptions about a business based on its building, branding, décor, and furnishings – even if this happens subconsciously.

Employees are impacted by their working environments. Offices and workspaces which are vibrant, comfortable, welcoming, and well-lit contribute to wellbeing and productivity. The opposite is true for drab and dingy offices. The interior design of a space makes it a better place to work.

OFFICE INTERIORS

Create a cohesive space that shares your story

The pandemic has shifted our ways of working. In the UK, employers expect the number of regular home workers to double, from 18% pre-pandemic to 37% post-pandemic (CIPD). Modern workplaces need to be versatile, open spaces set up for flexible working.

Graphics share your brand and create a cohesive, professional finish throughout the whole building. Meeting rooms, corridors, breakout spaces, and reception areas are a canvas for your branding and messages. Share your values, achievements, and your business's story.

BRANDED GRAPHICS
Supplied and fitted by our team

GET CREATIVE
Brighten meeting spaces with bold design

“A quality workspace design leads to a less stressful and more productive atmosphere.”

Forbes

WE CAN SUPPLY:

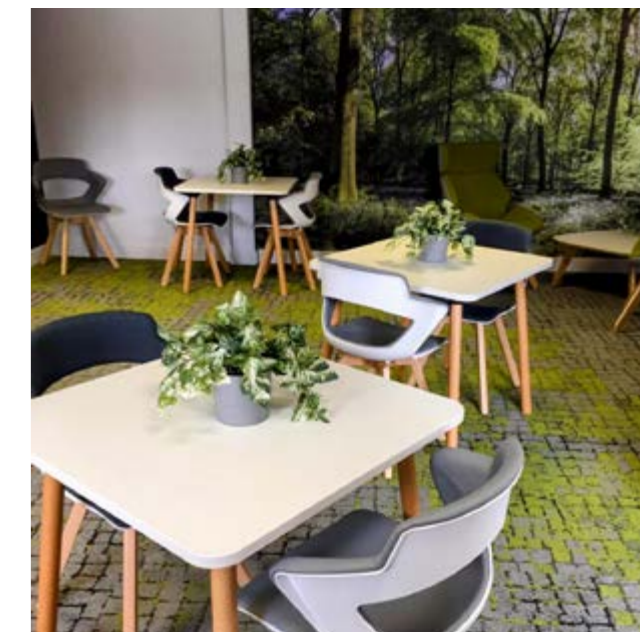

Wall graphics | Interior branding | Signage & notices | Reception displays | Directional signs | Whiteboards

BIOPHILIC DESIGN

Connecting your environment to nature

Biophilic design is a concept used by architects and designers to increase the connection to nature within an environment. It has health, environmental, and economic benefits for occupants and businesses.

Proximity to nature is thought to lower blood pressure and heart rate, while improving concentration and mental engagement. Everyone knows how unpleasant a windowless, airless office feels. Connecting to nature counters the strains of spending time in man-made spaces.

“The aim is to create naturally uplifting workspaces that reflect and embrace the beauty of the natural world.”

Yugen Design

We work with
specialists in
biophilic design

Workplaces that use biophilic principles in some way stand to improve wellbeing and facilitate productivity. Creating a relaxing and pleasant place to be encourages people to work from the office and helps with employee retention and recruitment drives.

Easy biophilic design ideas

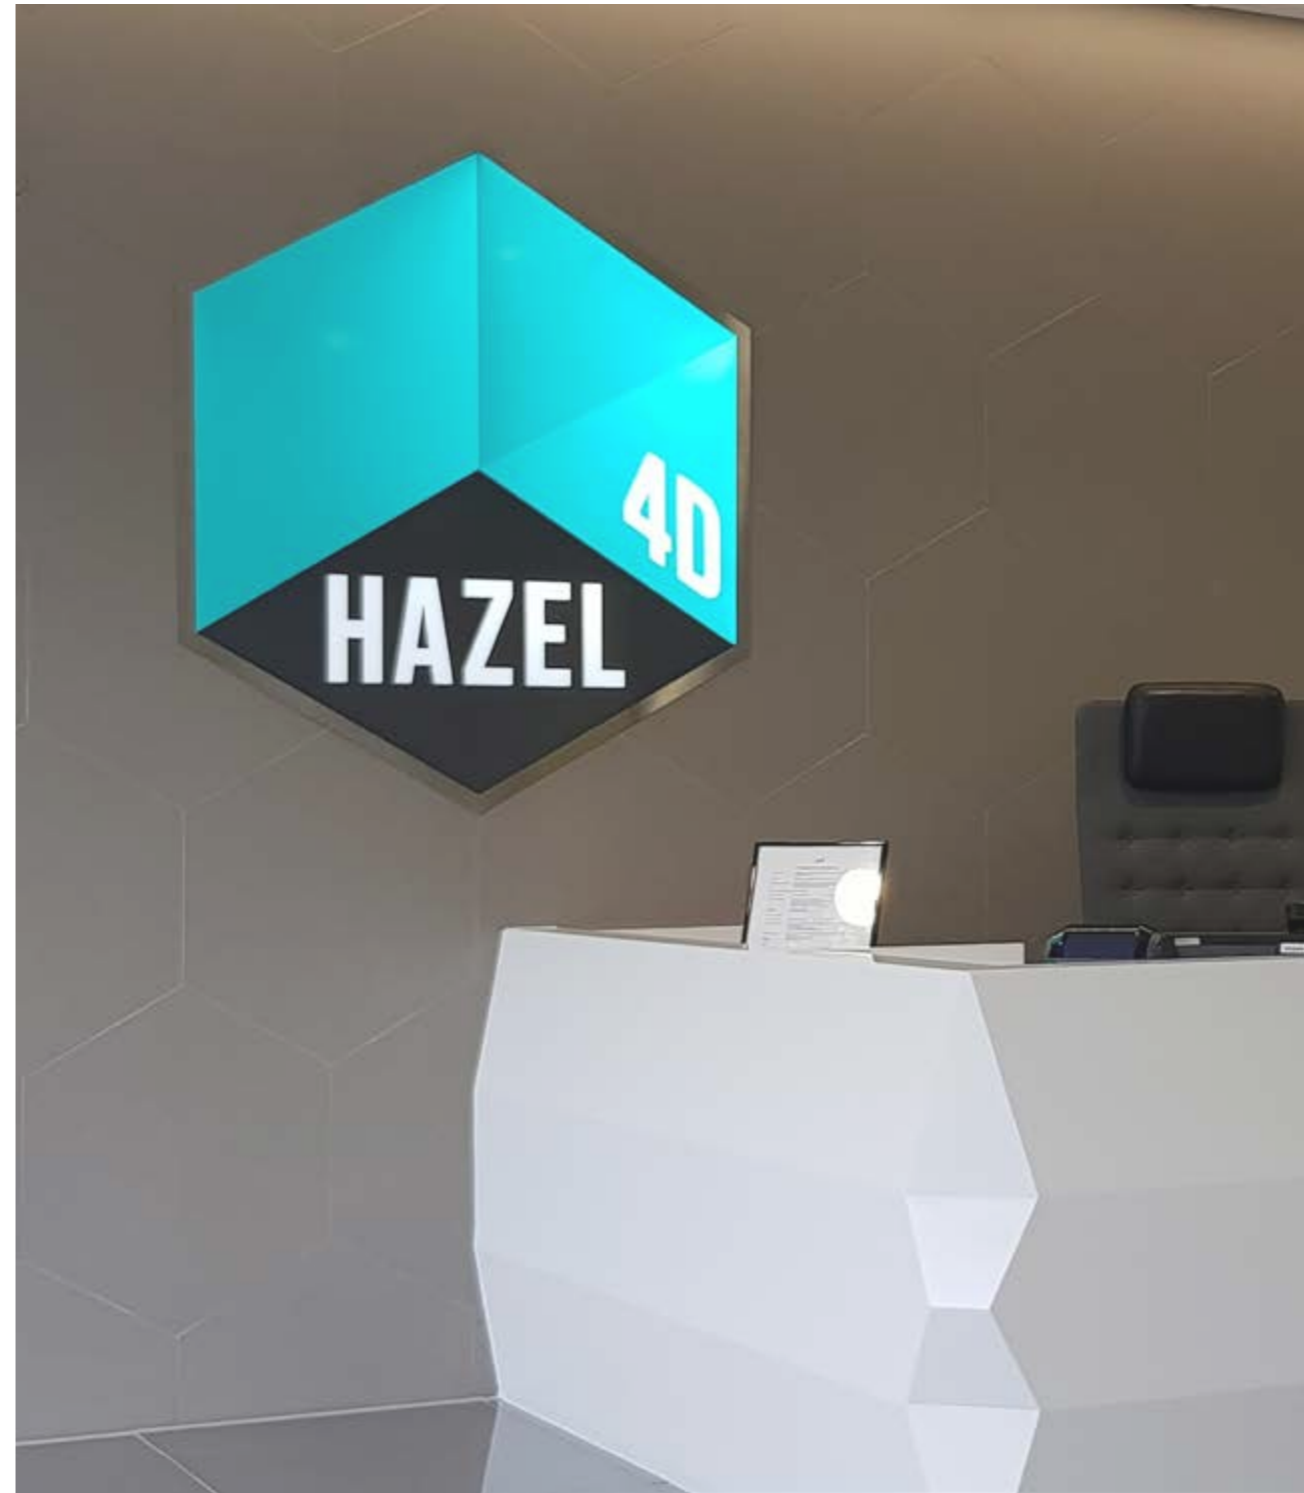

- Living walls
- Planters and plants
- Murals and wall graphics
- Fresh air proximity
- Natural lighting
- Floor graphics

ILLUMINATED SIGNS

Branding up in lights

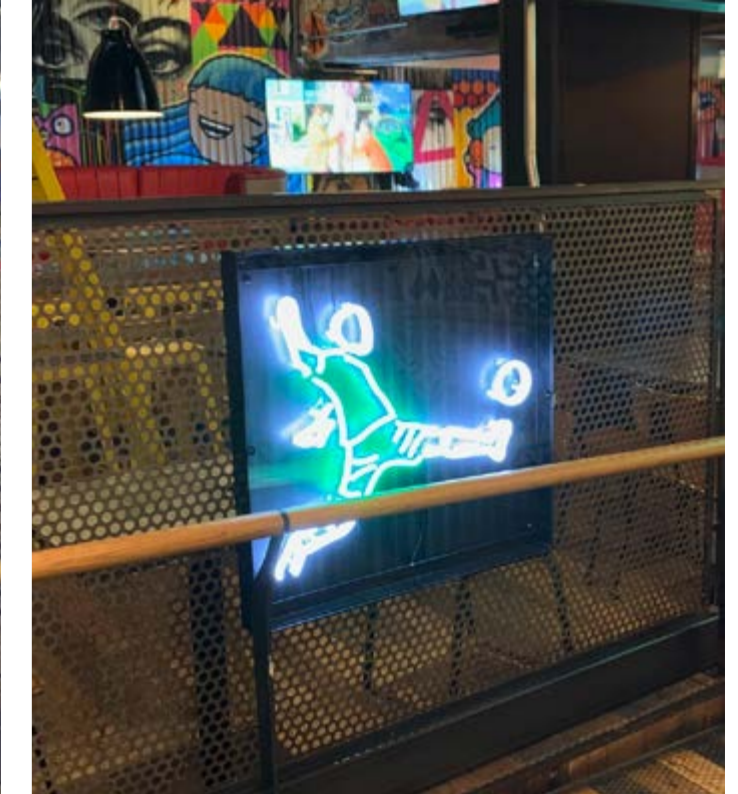

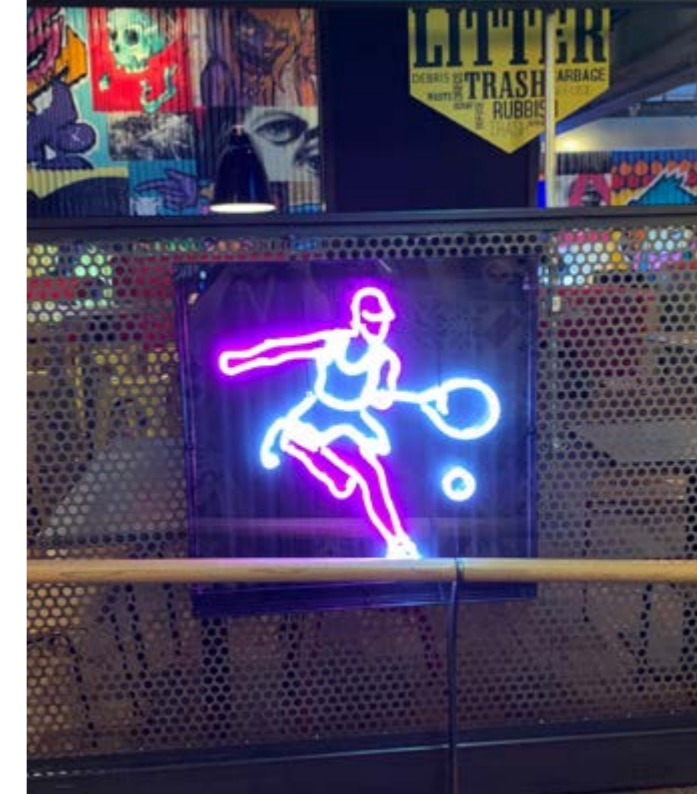

Illuminated signs have become more accessible and popular in recent years. There are many types of LED illuminated signs suitable for outdoor signage and facias, including various types of illuminated panels with cut lettering, and spot lit logos.

FAUX NEON

Faux neon signs are created using LEDs that replicate the look of traditional neon sign designs. They're affordable to run, easier to make and have a lower carbon footprint. Faux neon products enable a huge array of exciting designs.

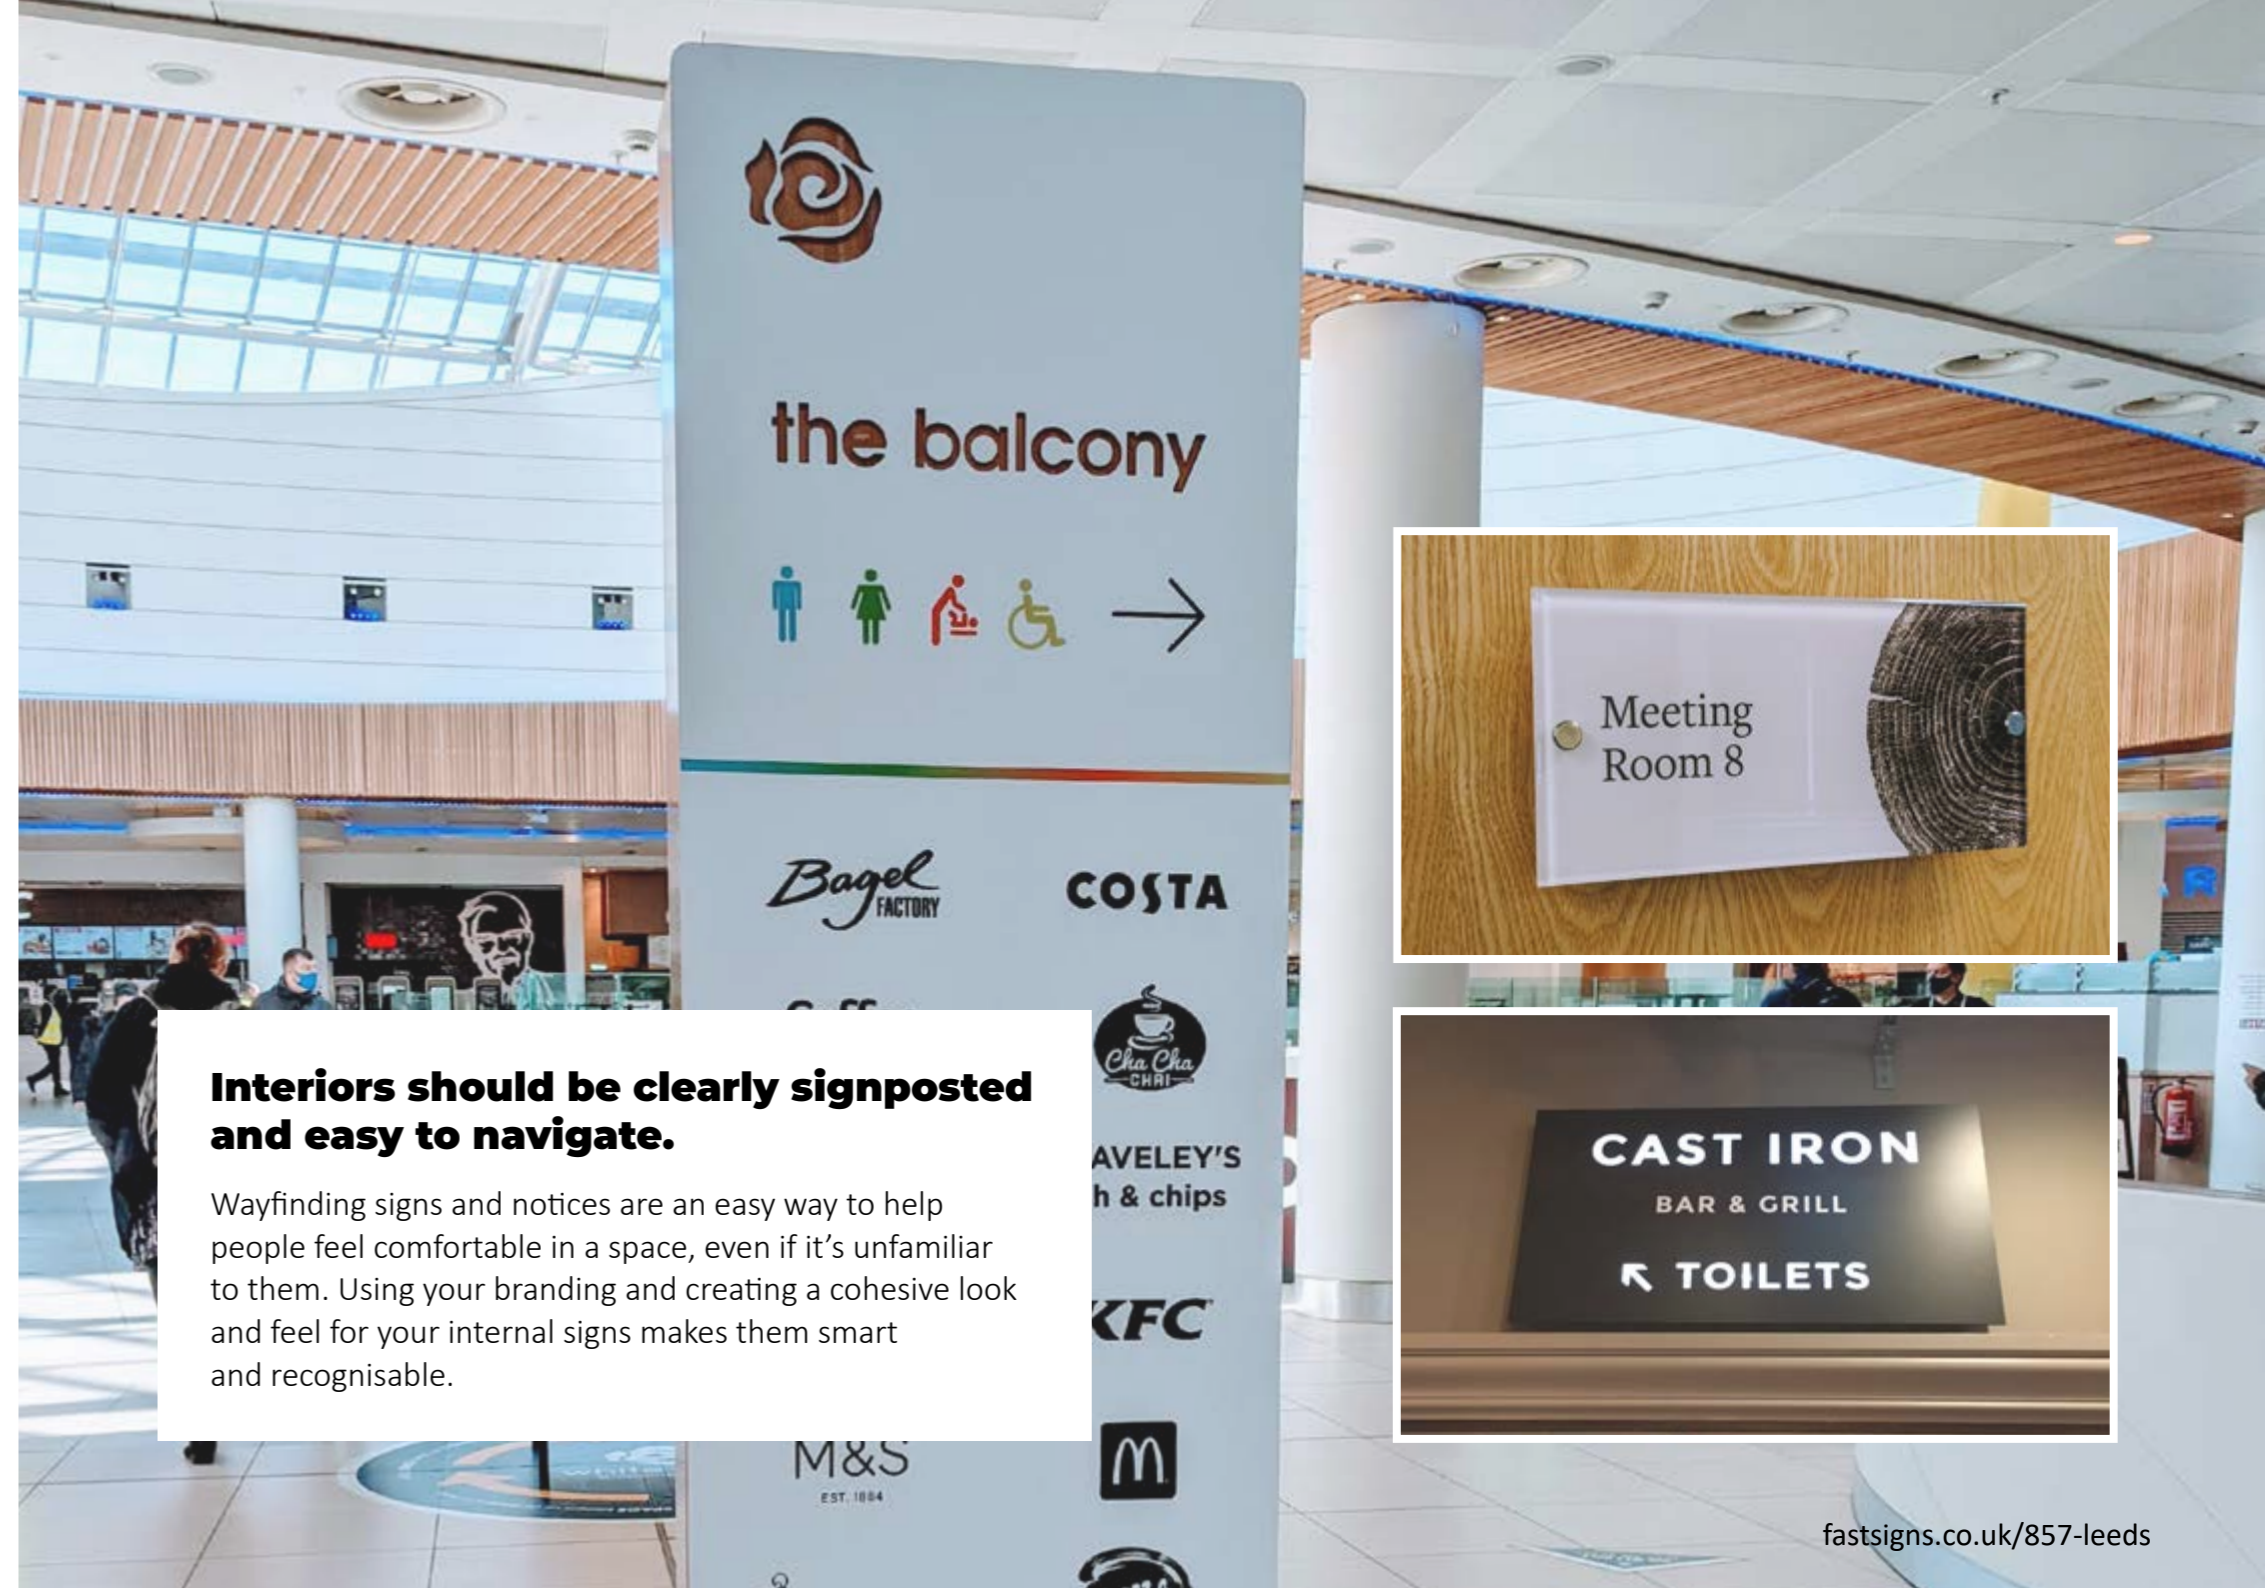

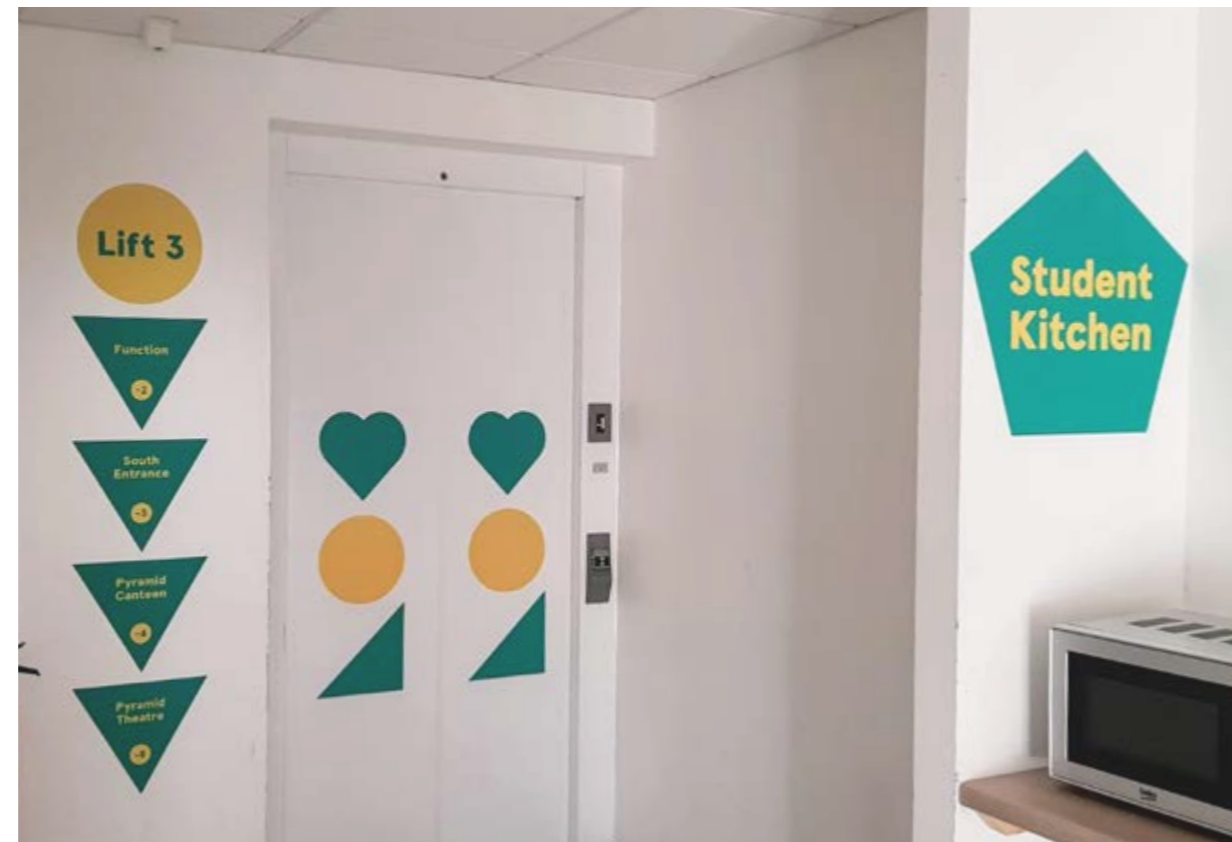

Why have an illuminated sign?

- Create a warm and inviting exterior
- Make signs visible in dark or gloomy conditions
- Create a statement indoors
- Light up your business name or branding
- Set a smart and professional tone

WAYFINDING SIGNS

Stylish and practical interiors

Communal areas in commercial properties and facilities need careful designing. These spaces must be appealing, safe, comfortable, and practical. Shared areas such as receptions, communal kitchens, recreation rooms, corridors and workspaces see plenty of footfall and use each day.

Interiors should be clearly signposted and easy to navigate.

Wayfinding signs and notices are an easy way to help people feel comfortable in a space, even if it's unfamiliar to them. Using your branding and creating a cohesive look and feel for your internal signs makes them smart and recognisable.

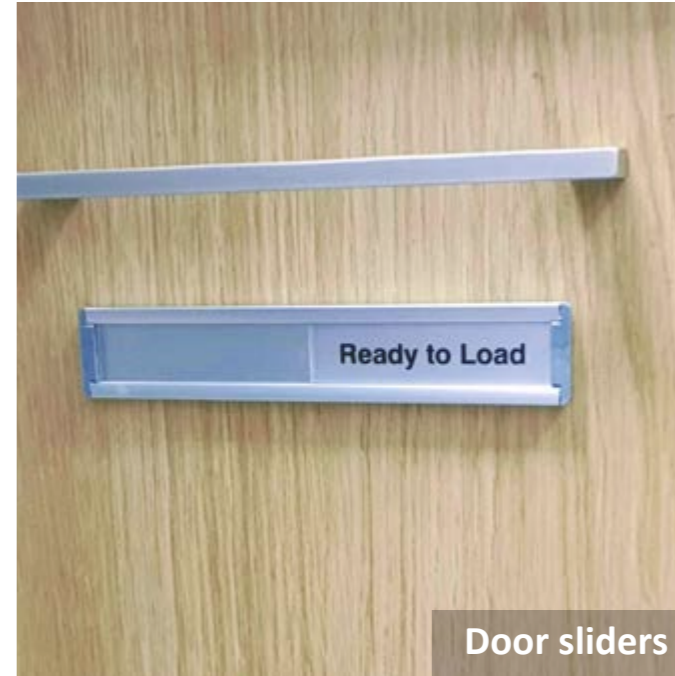

IMPRESS VISITORS
With a cohesive interior scheme

"I've been extremely impressed by the professionalism of the FASTSIGNS team – they were excellent to deal with. They worked quickly and the signage was completed to a very high standard"

Alex Duckett, Managing Director, Gilbanks

Inject colour into
your environment

EXTERIOR DESIGN

Start with the first impression

68% people believe *a business' signage reflects the quality of its products or services* – FedEx

Your interior design concept shouldn't stop in your entrance space. If you have a façade or outdoor signage, think about updating this. Your businesses exterior is what many people will see first, and people make an initial impression based on this.

If you're in an industry such as hospitality or retail, this is especially important. People expect your branding and interiors to reflect the quality of the items you serve or sell. Neglecting to look after your façade could put off new customers from stopping by.

Take your branding wherever you go

SAFETY SIGNS

Stay safe and compliant

Is your premises set up for safety?

All kinds of signs keep us safe at work. Warnings and notices, but also directional and access signs, speed limits, and hygiene labels.

LOGOPLASTE LEEDS

At Logoplaste Leeds we want everyone to demonstrate pride and respect in our surroundings.

We expect all colleagues, visitors and contractors to live these key safe behaviours;

- 1 Always walk around site - never run, and only use designated walkways.
- 2 When using the stairs and steps hold the hand rails and take one step at a time.
- 3 Always ensure your Personal Protective Equipment (PPE) is worn, fitted and disposed of correctly.
- 4 Mobile devices must not be used whilst you are on the move.
- 5 Always feel confident to challenge unsafe behaviours constructively and never knowingly walk past an unsafe act.

Easy navigation

Safety information needs to be clear and apparent. It should be easy to read and placed in the most obvious places. But this doesn't mean it needs to look out of place. Safety signs can be kept within your wider interior scheme and some can even include your branding.
