THE BRAIN REMEMBERS 6 TIMES MORE VISUAL INFORMATION THAN TEXT ALONE*

Making information visual with shapes, images and colour helps people remember it. It is more attention grabbing and boosts the impact of whatever you're trying to say.

When communicating with people, you only have a few seconds to make an impression. People are busy, and it's thought we are exposed to 6,000 to 10,000 adverts every single day, in various forms**

Getting your message heard in this noise means being clear, creative, and in the right place. Not every type of sign is right for each scenario. That's why we provide hundreds of different products.

Sound overwhelming? Don't worry, because we guide you through the process and make sure you get the right products for your project. In the meantime, browse some of the most popular signs and graphics we produce for some inspiration
